

## Abengoa signs Power Purchase Agreement with a leading Mexican food company

- Abengoa, through its subsidiary Abent 3T, will deliver 20.14 MW of clean energy to the purchaser.

September 13, 2018 – Abengoa (MCE: ABG/P:SM), the international company that applies innovative technology solutions for sustainability in the infrastructures, energy and water sectors has signed a Power Purchase Agreement (PPA) with a leading Mexican food company for 20.14 MW.

With this contract, the purchaser will receive, in its factories and distribution centers, clean energy for ten years. Energy will come from the A3T efficient cogeneration plant located in the town of Centro, in Villahermosa (Tabasco) and that Abent 3T is developing under the self-sufficiency scheme. The 220 MW plant will begin to supply energy in the fourth quarter of 2018.

The price of the PPA is similar to that of the Acceptable PPAs, as this term is defined in the Group's Finance Documents, resulting in a valuation for A3T that is consistent with the Company's previously stated strategy in this respect. After the signing of this PPA, the company has more than 75% of the energy of the plant already committed.

Abengoa is a world leader in the construction of cogeneration plants. Furthermore, the company is one of reference in electricity infrastructures in Mexico, where it has been present for over 35 years, developing projects in several: conventional and renewable power generation, power transmission and distribution, oil and gas, water and singular building projects.
