

## **Abengoa and Arpo Construcciones are awarded the remodelling works of the Seville airport terminal**

- This is the most ambitious project at Seville airport in the last three decades.
- The project amounts to 26.3 M€.

27<sup>th</sup> March, 2019 – Abengoa, (MCE: ABG/P:SM), the international company that applies innovative technology solutions for sustainability in the infrastructures, energy and water sectors, through its Transmission and Infrastructure vertical, has been selected by Aena to carry out, in consortium with the construction company Arpo Construcciones, what will be the most emblematic action of the last 30 years developed in the San Pablo Airport (Seville). The cost of the project is 26.3 M€ and the works have a completion period of 30 months.

Specifically, the Arpo-Inabensa joint venture will be responsible for developing the civil works and electromechanical installations of this remodelling of the airport terminal building.

The planned actions, which will allow the modernization of the facilities and the optimization of their operative capacities, entail the expansion and the remodelling of the terminal building in order to adapt its configuration to the needs of the current operative, optimize the platform, improve the passenger services and adapt the terminal to the new accessibility and fire-fighting regulations.

On the other hand, the northern area of the terminal will be also extended with more space for boarding and disembarking and the passport control area will be adapted to the new regulatory requirements.

In addition, the parking apron of the aircrafts will be restructured to reduce the distance that passengers must walk down in those flights that board on foot.

Abengoa, with more than 30 years of experience, is a benchmark in the development of infrastructures and installations at airports, including those with the highest passenger traffic in Spain, such as Adolfo Suarez Madrid Barajas, Barcelona-El Prat, Palma de Mallorca, Malaga-Costa del Sol, Alicante-Elche, Gran Canaria, Tenerife-Sur or Ibiza, and outside Spain, such as Paris-Orly, in France; or Agadir, in Morocco.
